provide a quote for roof services -  
please visit our website and  
complete the request a quote  
form and we will contact you by  
the next business day.

### Works completed this month

#### Woollahra, Ocean Street

Vostek Roofing recently  
completed works at a home  
on Woollahra. The works  
were designed to stop  
water ingress onto the floor  
below. Vostek employees'  
consultated with the client  
to minimise disruption to  
his day and home  
intrusiveness.

Vostek completed the works  
quickly as to allow the  
client a non-stressful  
project. Vostek also  
delivered the project on  
budget with a high quality  
finished product. The  
project required Vostek to  
solve drainage issues and to  
stop further water ingress.  
Along with the roof  
plumbing works Vostek

re-roofed and re-  
guttered the home. The  
roof required a newly  
laid box gutter to be  
completed in order to  
stop pooling and rust  
forming. The project  
required longer roof  
sheets in order to  
minimise spray back  
underneath the sheet  
causing water ingress and  
new insulation.  
The works have been  
completed with no  
damage to the clients  
home as well as water  
ingress stopped  
completely.

# Vostek Roofing Past Projects

## Royal North Shore Hospital

Vostek Roofing has completed numerous Tier 1 projects in the past. One of which is the Royal North Shore Hospital. Vostek installed roofs on the main hospital and the community health centre.

## Sydney Harbour Bridge Northern Pylon

In 2008 Vostek Roofing undertook works on the northern pylon of the Sydney Harbour Bridge. The project was complicated with an array of obstacles during completion with safety and high regulation always considered during works. Vostek employees' worked conscientiously to minimise disruption to pedestrians and to manage safety.

## Cockatoo Island

In 2007 Vostek completed a broad degree of works on the island. Vostek undertook works on Warehouse 10 and the barbecue and shower block. The location of the project proved the most challenging factor in regards to material delivery and employee transport.
