

VOSTEK ROOFING NEWSLETTER

Inside this July issue::
Kirrawee concrete plant and
Vostek roof checks to prolong
roof life as well as our
promise at Vostek.

Vostek Roofing, your metal roofing specialists

We've got you covered

Whats on at Vostek in July.

Kirrawee Concrete Plant

Vostek has recently completed works on the Tait and Condon concrete plant in Kirrawee. Safety was an important factor during the completion as the scope of works involved high risk activity included the rolling of roof safety wire, removing and replacing roof and soffit sheeting as well as installing drainage systems for the building, all of which involved a degree of risk. Vostek ensured safe work measures by completing Safe Work Method Statements with the procedures implemented on site accordingly.

Hand rails were also implemented to comply with Australian safety standards.

Vostek Roof Checks

The life of your roof can easily be prolonged with a few simple checks. As metal expands and contracts under changing temperatures, fasteners can dislodge and fall out allowing the lap joints in flashing and gutters to open. This inevitably allows moisture to penetrate the roof and accelerate corrosion. A simple check can put your mind at ease and ensure any damage or impact beyond the roofline is mitigated.

Our Promise at Vostek Quality - Service - Integrity

Vostek is committed to delivering high quality finished products on time and within the agreed price. Vostek employees are conscientious and are mindful to minimise the intrusiveness of works. For all your metal roofing needs please do not hesitate to contact us via the information below.
